You said, we did

What we built from our pilot schools' feedback · November 2026

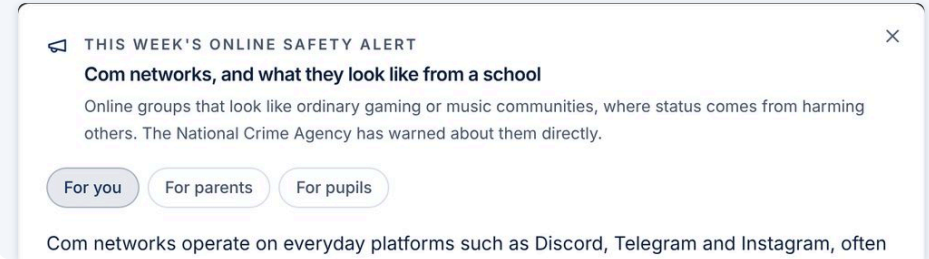

onlinesafeschools.com

YOU SAID · YOUR BIGGEST WORRY

"The emergence of AI and deep fakes, how pictures and information can be used to create very realistic fakes."

WE BUILT

A short online safety alert every Monday. What is changing, a note for your parent newsletter and a talking point for pupils, so the whole school hears about new risks such as AI fakes as they appear.

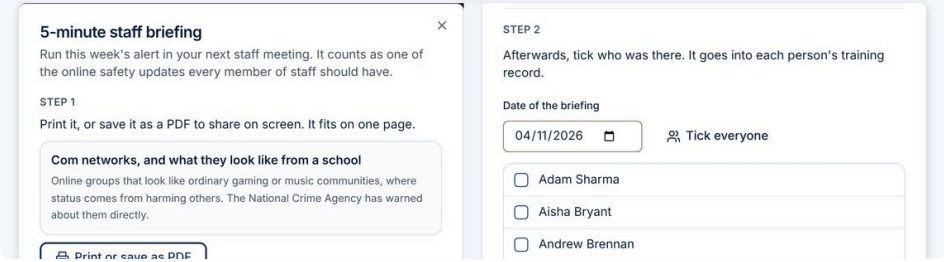

YOU SAID · WHERE THE TIME GOES

"Staff training but ensuring it is fresh in the minds of staff and not just an annual refresher that is quickly forgotten."

WE BUILT

A 5-minute staff briefing. One click turns the Monday alert into a one-page briefing. Tick who was there and it goes into each person's training record, ready to download for your training matrix.

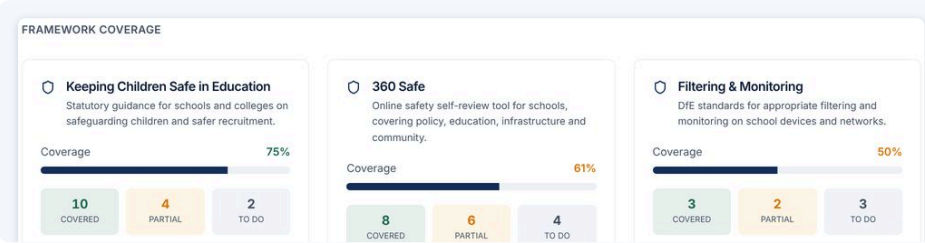

YOU SAID · WHAT HAS CHANGED

"...the new Ofsted framework seems to make it more difficult for schools."

WE BUILT

Evidence that follows the Ofsted schools inspection toolkit. One dated PDF of where you stand against KCSIE, the DfE standards and your other frameworks, and what your team has done, ready whenever someone asks.

YOU SAID · THE ONE THING

"More time in people's weeks which could be used for training and CPD in all areas, including cybersecurity."

WE BUILT

A calmer first screen. Five numbers, four doors and one fix a week. Staff engagement shows who is keeping up and who may need a hand, without scrolling.

Screens are from the Online Safe Schools demo school, with example data. See it for yourself at onlinesafeschools.com/start.
